

Voluntary Product Accessibility Template (VPAT)

DATE: September 6, 2018

PRODUCT NAME: Intel® Advisor 2019 for Windows*

PRODUCT VERSION NUMBER: 2019

VENDOR COMPANY NAME: Intel Corporation

VENDOR SUPPORT SITE: <https://software.intel.com/support>

APPENDIX A: SUGGESTED LANGUAGE GUIDE

Summary Table Voluntary Product Accessibility Template		
Criteria	Level of Support & Supporting Features	Remarks and explanations
Section 1194.21 Software Applications and Operating Systems	DOES NOT SUPPORT	Keyboard navigation is not provided for all menu commands. Many controls in dialog boxes such as tabs and tree controls are not keyboard accessible. Panels that make use of complex controls and graphics are not keyboard accessible. With the exception of application menus, role, state and identity information is not available for most controls in the product interface.
Section 1194.22 Web-based Internet Information and Applications	NOT APPLICABLE	
Section 1194.23 Telecommunications Products	NOT APPLICABLE	
Section 1194.24 Video and Multi-media Products	NOT APPLICABLE	
Section 1194.25 Self-Contained, Closed Products	NOT APPLICABLE	

Section 1194.26 Desktop and Portable Computers	NOT APPLICABLE	
Section 1194.31 Functional Performance Criteria	SUPPORTS WITH EXCEPTIONS	<p>With the exception of application menus and some controls, elements in the product user interface are not accessible to screen readers.</p> <p>There is limited keyboard access to some tabbed dialog boxes.</p> <p>The product supports the use of screen magnifiers but for some controls there is not a clear indication of current focus and focus is not exposed programmatically.</p> <p>The product's command line interface provides a textual interface for a subset of the product functionality.</p>
Section 1194.41 Information, Documentation and Support	SUPPORTS	Information, documentation and support are in compliance with the requirements.

Section 1194.21 Software Applications and Operating Systems - Detail Voluntary Product Accessibility Template

Criteria	Level of Support & Supporting Features	Remarks and explanations
(a) When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	DOES NOT SUPPORT	<p>Keyboard navigation is not provided for all menu commands. Many controls in dialog boxes such as tabs and tree controls are not keyboard accessible.</p> <p>Panels that make use of complex controls and graphics are not keyboard accessible.</p>
(b) Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where	SUPPORTS	There is nothing in the product that will cause disruption or disable

<p>those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.</p>		<p>activated features of other products or of the Operating System that are Accessibility features.</p>
<p>(c) A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that Assistive Technology can track focus and focus changes.</p>	<p>SUPPORTS WITH EXCEPTIONS</p>	<p>With the exception of some controls in the grid, configuration dialogs and dialog boxes most elements in the product interface provide a well-defined on-screen indication of focus. When focus is on some controls in the grid, it is not programmatically exposed to assistive technology.</p>
<p>(d) Sufficient information about a user interface element including the identity, operation and state of the element shall be available to Assistive Technology. When an image represents a program element, the information conveyed by the image must also be available in text.</p>	<p>DOES NOT SUPPORT</p>	<p>With the exception of application menus, role, state and identity information is not available for most controls in the product interface.</p>
<p>(e) When bitmap images are used to identify controls, status indicators, or other programmatic elements, the meaning assigned to those images shall be consistent throughout an application's performance.</p>	<p>SUPPORTS</p>	<p>The product provides consistent usage of bitmap and other graphical elements.</p>
<p>(f) Textual information shall be provided through operating system functions for displaying text. The minimum information that shall be made available is text content, text input caret location, and text attributes.</p>	<p>DOES NOT SUPPORT</p>	<p>With the exception of application menus, textual information is not programmatically exposed to assistive technologies.</p>
<p>(g) Applications shall not override user selected contrast and color selections and other individual display attributes.</p>	<p>SUPPORTS</p>	<p>The product does not override any user selected contrast or color selection or any individual display attributes.</p>
<p>(h) When animation is displayed, the information shall be displayable in at least one non-animated presentation mode at the option of the user.</p>	<p>SUPPORTS WITH EXCEPTIONS</p>	<p>Animations are used as progress indicators and as activity indicators. Such indicators are not significant for the use of</p>

		the product. The information from the animations is also available as text, but in some cases this text is not available to assistive technologies.
(i) Color coding shall not be used as the only means of conveying information, indicating an action, prompting a response, or distinguishing a visual element.	DOES NOT SUPPORT	
(j) When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	NOT APPLICABLE	The product does not permit user to adjust color and contrast setting. The product uses whatever the system is set to.
(k) Software shall not use flashing or blinking text, objects, or other elements having a flash or blink frequency greater than 2 Hz and lower than 55 Hz.	SUPPORTS	The product does not use flashing or blinking text or objects or any other elements.
(l) When electronic forms are used, the form shall allow people using Assistive Technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	DOES NOT SUPPORT	Forms fields in dialog boxes do not provide identity information to assistive technologies. Some form fields are not reachable with the keyboard alone and do not provide identity information.

**Section 1194.31 Functional Performance Criteria – Detail
Voluntary Product Accessibility Template**

Criteria	Level of Support & Supporting Features	Remarks and explanations
(a) At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for Assistive Technology used by people who are blind or visually impaired shall be provided.	DOES NOT SUPPORT	With the exception of application menus and some controls, elements in the product user interface are not accessible to screen readers. There is limited keyboard access to some tabbed dialog boxes.
(b) At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70	SUPPORTS WITH EXCEPTIONS	The product supports the use of screen magnifiers but for some controls there is not a clear

shall be provided in audio and enlarged print output working together or independently, or support for Assistive Technology used by people who are visually impaired shall be provided.		indication of current focus and focus is not exposed programmatically. The product's command line interface provides a textual interface for a sub-set of the product functionality.
(c) At least one mode of operation and information retrieval that does not require user hearing shall be provided, or support for Assistive Technology used by people who are deaf or hard of hearing shall be provided	NOT APPLICABLE	No Audio information or operation required – No information retrieval requires hearing.
(d) Where audio information is important for the use of a product, at least one mode of operation and information retrieval shall be provided in an enhanced auditory fashion, or support for assistive hearing devices shall be provided.	NOT APPLICABLE	Audio information is not required for operation of the product.
(e) At least one mode of operation and information retrieval that does not require user speech shall be provided, or support for Assistive Technology used by people with disabilities shall be provided.	NOT APPLICABLE	Speech is not required for operation of the product.
(f) At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	SUPPORTS	No fine motor control or simultaneous actions required.

Section 1194.41 Information, Documentation and Support – Detail Voluntary Product Accessibility Template

Criteria	Level of Support & Supporting Features	Remarks and explanations
(a) Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge	SUPPORTS	Intel Corporation provides electronic versions of all product support documentation.
(b) End-users shall have access to a description of the accessibility and compatibility features of products in	SUPPORTS	Intel Corporation provides information on accessibility and compatibility features upon

alternate formats or alternate methods upon request, at no additional charge.		request at no additional charge.
(c) Support services for products shall accommodate the communication needs of end-users with disabilities.	SUPPORTS	Product support for Intel® Software Development Products is available in a variety of formats and from a number of online sources available from Intel Corporation.

**APPENDIX A (OF THE DOS VPAT/GPAT CHECKLIST)
SUGGESTED LANGUAGE FOR FILLING OUT THE VPAT/GPAT**

In order to simplify the task of conducting market research assessments for procurement officials or customers, ITIC (Information Technology Industry Council) has developed suggested language for use when filling out a VPAT/GPAT. You may choose to employ all or some of the language below. Once you determine what language you intend to use, we recommend that use is consistent throughout all of your VPAT/GPATs.

**SUPPORTING FEATURES (COLUMN 2 ON VPAT/GPAT)
SUPPORTS**

Use this language when you determine the product fully meets the letter and intent of the Criteria.

SUPPORTS WITH EXCEPTIONS

Use this language when you determine the product does not fully meet the letter and intent of the Criteria, but provides some level of access relative to the Criteria.

SUPPORTS THROUGH EQUIVALENT FACILITATION

Use this language when you have identified an alternate way to meet the intent of the Criteria or when the product does not fully meet the intent of the Criteria.

SUPPORTS WHEN COMBINED WITH COMPATIBLE AT

Use this language when you determine the product fully meets the letter and intent of the Criteria when used in combination with Compatible AT. For example, many software programs can provide speech output when combined with a compatible screen reader (commonly used assistive technology for people who are blind).

DOES NOT SUPPORT

Use this language when you determine the product does not meet the letter or intent of the Criteria.

NOT APPLICABLE

Use this language when you determine that the Criteria do not apply to the specific product.

**NOT APPLICABLE - FUNDAMENTAL ALTERATION EXCEPTION APPLIES
USE THIS LANGUAGE WHEN YOU DETERMINE A FUNDAMENTAL ALTERATION OF
THE PRODUCT WOULD BE REQUIRED TO MEET THE CRITERIA (SEE THE ACCESS
BOARD STANDARDS FOR THE DEFINITION OF "FUNDAMENTAL ALTERATION").**
